

EnterpriseFlow CRM

Multi-Company Service Desk Platform - V1 Demo Evidence

Production deployment evidence and interview/demo screenshots

Frontend: crm-application-vert.vercel.app

Backend: crm-application-ahkr.onrender.com

Verified V1 capabilities

- Multi-company tenant isolation using companyId
- RBAC: SUPER_ADMIN, ADMIN, ENGINEER, CUSTOMER
- Customer-only and engineer-assigned ticket visibility
- Ticket creation, status workflow, comments and audit history
- Persistent in-app notifications
- Transactional email notifications via Resend HTTPS
- React/Vite on Vercel + Node/Express on Render + MongoDB Atlas

Prepared from screenshots captured from the deployed application during final V1 validation.

1. Secure Login

JWT-based sign-in for the deployed EnterpriseFlow CRM application.

2. Super Admin - Company Management

Platform-wide company administration showing multiple isolated tenant organizations.

The screenshot displays the EnterpriseFlow CRM Super Admin interface. The browser window shows multiple tabs, including 'CRM Application', 'EnterpriseFlow CI', 'CRM-Application', 'API keys | Google', 'Mithun9661/CRM', 'New Project - Ve', and 'Database Access'. The address bar shows 'crm-application-vert.vercel.app'. The interface has a dark theme with a purple accent color.

4. Super Admin - Global Ticket Workspace

Authorized platform-wide ticket visibility with search, filters, priorities and tenant-aware access.

The screenshot displays the EnterpriseFlow CRM Super Admin Global Ticket Workspace. The interface is divided into a left sidebar and a main content area. The sidebar, under the 'WORKSPACE' header, contains links for 'Dashboard', 'Tickets' (highlighted), 'Create Ticket', 'Users', and 'Companies'. The main content area is titled 'CRM TICKET WORKSPACE' and 'Support Tickets'. It features a search bar with the placeholder 'Title, description, reporter or assignee' and filters for 'STATUS' (All), 'PRIORITY' (All), 'SORT' (Newest first), 'FROM' (dd-mm-yyyy), 'TO' (dd-mm-yyyy), and 'ASSIGNEE' (Engineer user ID). A 'PER PAGE' dropdown is set to 6. Below the filters are 'Apply Filters' and 'Clear' buttons. The main area displays three ticket cards: 1. 'CLOSED' (P2): 'Customer cannot download invoice PDF'. Description: 'Customer reports that clicking Download Invoice opens a blank page instead of downloading the PDF. Please investigate the billing portal response and restore invoice download...'. Reporter: admin, Assignee: engineer_demo, Created: 9/15/2026. 2. 'IN PROGRESS' (P2): 'Dashboard analytics mismatch'. Description: 'Open ticket count does not match the filtered ticket workspace after a status update.'. Reporter: admin, Assignee: engineer_demo, Created: 9/14/2026. 3. 'OPEN' (P3): 'Customer export file missing phone numbers'. Description: 'CSV export completes successfully but the phone column is blank for some customer records.'. Reporter: nova_admin, Assignee: nova_engineer, Created: 9/14/2026. Each card has a 'Details & Activity' button. The top right shows 'Enterprise Workspace · Super Admin · SUPER ADMIN' and a 'Logout' button. The bottom of the screen shows a Windows taskbar with a search bar, various application icons, and system status (30°C, Light rain, 21:40, 15-09-2026).

5. Customer Isolation

Customer account sees only its own support tickets; cross-company and other-user tickets remain hidden.

The screenshot displays the EnterpriseFlow CRM interface in a web browser. The browser's address bar shows the URL `crm-application-vert.vercel.app`. The page header includes the EnterpriseFlow CRM logo, a user profile for 'EnterpriseFlow Demo · Priya Verma · CUSTOMER', and a 'Logout' button. A notification bell icon shows 3 matching tickets.

The main section is titled 'Support Tickets' with the subtitle 'Search, filter, prioritize and manage live customer requests.' It features a search bar and several filter options:

- SEARCH:** A text input field with the placeholder 'Title, description, reporter or assignee'.
- STATUS:** A dropdown menu currently set to 'All'.
- PRIORITY:** A dropdown menu currently set to 'All'.
- SORT:** A dropdown menu currently set to 'Newest first'.
- FROM:** A date input field set to 'dd-mm-yyyy'.
- TO:** A date input field set to 'dd-mm-yyyy'.
- PER PAGE:** A dropdown menu currently set to '6'.

Below the filters are two buttons: 'Apply Filters' and 'Clear'.

The tickets are displayed in three columns, each with a status badge and a priority level:

- OPEN (P3):** Ticket titled 'Unable to update profile information'. Description: 'Customer is unable to update phone number and address in the profile section. Please investigate the issue.' Reporter: 'customer_demo', Assignee: 'engineer_demo', Created: '9/15/2026'.
- IN PROGRESS (P1):** Ticket titled 'Unable to access customer billing portal'. Description: 'Billing portal returns an access denied message for approved customer accounts.' Reporter: 'customer_demo', Assignee: 'engineer_demo', Created: '9/12/2026'.
- CLOSED (P3):** Ticket titled 'Resolved password reset request'. Description: 'Customer requested help resetting credentials after multiple failed login attempts.' Reporter: 'customer_demo', Assignee: 'engineer_demo', Created: '9/10/2026'.

Each ticket card has a 'Details & Activity' button at the bottom.

The bottom of the screen shows a Windows taskbar with the date '15-09-2026' and time '22:49'.

6. Engineer Operations Dashboard

Engineer-scoped workload dashboard with assigned-ticket activity and notification center.

The screenshot displays the EnterpriseFlow CRM interface for an engineer. The browser address bar shows the URL `crm-application-vert.vercel.app`. The top navigation bar includes the EnterpriseFlow CRM logo, a notification bell with a red badge, the user profile "EnterpriseFlow Demo · Aarav Sharma · ENGINEER", and a "Logout" button. The left sidebar, titled "WORKSPACE", contains links for "Dashboard", "Tickets", and a "+ Create Ticket" button. The main content area, labeled "CRM SERVICE DESK", features the "Operations Dashboard" with the subtitle "Live support workload, team capacity and recent ticket activity." and a "Refresh" button. The dashboard is divided into several sections: 1. Ticket Status Summary: Four cards showing "TOTAL TICKETS" (10), "OPEN TICKETS" (6), "IN PROGRESS" (2), and "RESOLVED" (2). 2. Detailed Metrics: Four cards showing "High Priority" (1), "Customers" (1), "Engineers" (1), and "Total Users" (3). 3. Latest Activity: A "Recent Tickets" list with five entries, each showing a title, user, date, status, and priority. 4. Workload: A "Priority Breakdown" chart showing the distribution of tickets across five priority levels.

7. Ticket Details, Status & Audit Trail

Engineer workflow for status updates, comments and persistent ticket history.

The screenshot displays a web browser window with multiple tabs open, including 'API keys · Res...', 'EnterpriseFlow', 'CRM-Applica...', 'API keys | Go...', 'Mithun9661/', 'New Project', 'Database Acc...', 'CRM Applica...', and 'Ask Gemini'. The address bar shows 'crm-application-vert.vercel.app'. The main content area is a dark-themed interface for a ticket titled 'Unable to update profile information' with ID '#48ACE7A2'. The ticket details section includes fields for STATUS (OPEN), PRIORITY (P3), REPORTER (customer_demo), and ASSIGNEE (engineer_demo). The DESCRIPTION field contains the text: 'Customer is unable to update phone number and address in the profile section. Please investigate the issue.' Below this is an 'UPDATE STATUS' section with a dropdown menu set to 'OPEN' and a 'Save Status' button. The interface also features a 'COLLABORATION' section with a 'Comments' header and a text input field for adding internal notes or customer updates. To the right of the comments is an 'AUDIT TRAIL' section titled 'Ticket History' showing a single entry: 'TICKET CREATED' by 'customer_demo' on '9/15/2026, 10:48:37 PM'. The bottom of the screen shows a Windows taskbar with a search bar, various application icons, and system status information including '29°C Partly cloudy', 'ENG IN', and the date '15-09-2026'.

Final End-to-End Verification

- PASS** Super Admin can manage companies and view cross-tenant data.
- PASS** Customer isolation verified: customer_demo sees only its own EnterpriseFlow tickets.
- PASS** Engineer isolation verified: engineer_demo works on assigned same-company tickets.
- PASS** Engineer status update OPEN -> IN_PROGRESS recorded in ticket history.
- PASS** Engineer comment recorded in audit trail and generated customer notification.
- PASS** MongoDB-backed in-app notifications verified.
- PASS** Resend HTTPS email delivery verified end-to-end to the test inbox.

Interview closing point:

The main engineering challenge was secure tenant-aware and role-aware authorization, not just CRUD.
